Finishes available	Stainless steel
Weight	29.3g
Mounting hole size	19mm
Ferrule size	M10 or 8mm
Min. fibre size	2mm
Max. fibre size	6mm

Our range of classic paver fittings are all manufactured from hard wearing, corrosion resistant 316 stainless steel, and fitted with high quality toughened glass.

Available in a wide range of sizes, paver fittings can generally be used with fibre sizes ranging from 2mm up to 8mm diameter. This is dependant on the size of ferrule the fitting can accept.

All pavers are supplied in natural stainless steel and most types are available with a choice of clear or frosted glass.

The P21 is a small walkover paver with a 25mm round, bevelled flange and a total depth of 26mm. Fitted with a 13mm diameter toughened glass front. The P21 uses an 8mm smooth ferrule which is secured with a M4 grub screw. Available with an optional mounting spring to aid installation.
