Rev. C1

UFO E1 Submersion Fitting

A large submersible eyeball fitting manufactured from stainless steel with a clear focusing lens.

Available with a backnut for fixing through a panel or back box for fitting into a certikin 2" class C pool pipe for more accurate and easier installation.

Our submersible eyeball fitting range are suitable for installation in constant immersion settings such as swimming pools, ponds and water features.

Mainly used to provide side-lighting they project a beam of light from the mounting surface through the water.

Use of a separate backbox means that they can be pre-fitted when concrete is being poured or retro fitted into existing stone or concrete. A wide flange allows superior sealing against smooth surfaces.

The eyeball part of the fitting is sealed against water ingress with an o-ring compressed by a locking ring.

TECHNICAL INFORMATION	
Lens	26mm clear focusing lens
Focus range	20° - 40°
Material	Stainless steel
Finishes available	Natural
Weight	913g
Flange size	68mm
Ferrule size	M10
Min. fibre size	2mm
Max. fibre size	8mm
